MEMBER AGREEMENT (sign below)														
Member certifies that he/she purchased and installed the equipment listed in this application at the defined location served by the Cooperative. Member agrees that all information is true and that he/she has conformed to all program and equipment requirements provided with the application. The Cooperative reserves the right to inspect equipment and verify this information before issuing an incentive payment/credit.

Terms and Conditions—Heating Rate and Boiler Incentive Programs

Heat Plus Rate Program (After May 31, 2003)

This heating rate program applies to members with approved electric space heating equipment. The Heat Plus Rate will be effective beginning October 1, 2003. On this date, existing Dual Fuel and Interruptible program participants will be rolled over into the Heat Plus Program. New rebates amounts for this program will be available after May 31, 2003 for new participants.

There is a rolling 5-year guarantee of rate availability which will be up for renewal on an annual basis. This guarantee, however, does not fix the magnitude of the rate offered.

Program Requirements:

1. The primary heating system must be electric and metered separately.
2. The primary electric heating source must operate first, with the backup system operating only when the primary system is unable to satisfy the indoor thermostat setting.
3. A Premium electric water heater must be installed and provide 100% of the domestic water heating for the home (except for energy supplied from an electric heat pump desuperheater). This requirement will not be enforced for participants grandfathered into this program.
4. The space heated by the primary electric system must be an area of 400 square feet or more.

Note: The Heat Plus rate is not intended to be applied to periodic heating applications or to provide heating during peak winter conditions only. A system where the building is totally unheated during unoccupied times is unacceptable.

The Cooperative reserves the right to suspend the rate and remove any metering equipment owned by the Cooperative if the customer is no longer using the equipment on a regular basis or is in violation of any program requirement.

Electric Boiler Incentive Program

This program applies to members that install a new approved electric boiler used for space heating equipment.

Program Requirements:

1. The boiler must be electric and operate as the primary system in a closed-loop boiler application.
2. The boiler must be certified by the American Society of Mechanical Engineers (ASME) with the ASME H Code Symbol stamp visible on the actual boiler vessel and/or unit nameplate/label. (see below). This stamp indicates that the item conforms to the latest edition of the ASME Boiler and Pressure Vessel Codes.
3. The unit must be CSA or UL approved. This information should also be visible on the unit.
4. All information must be completed on the appropriate incentive form supplied by the Cooperative.

ASME H Stamp

Warranty Information: Your cooperative makes no warranties, expressed or implied, with respect to equipment operation, material, workmanship or manufacturing. The Cooperative does not guarantee that a certain level of energy or cost savings will result from the use of products covered by this program.

Limitation of Liability: Participating Customers agree that the Cooperative's liability, in connection with this Program, is limited to paying the Program Incentive specified (when all Terms and Conditions have been satisfied by the customer). Under no circumstances shall the Cooperative be liable for any consequential or incidental damages resulting from participation in this Program. The Cooperative will not be responsible for any tax liability that may be imposed on the Participating Customer as a result of the payment of Program Incentives.

Participating Customer's Certification: Participating Customer certifies that he/she operates the equipment listed in their application at their defined location served by the Cooperative. Participating Customer agrees that all information is true and that he/she has conformed to all of the program and equipment requirements listed in the application.

Program Changes/Termination: While this rebate program will be in effect for an indefinite period, the Cooperative reserves the right to extend, modify (this includes incentive levels) or terminate this Program without prior or further notice. Typically, a 60 day notice will be made in the event that any program is terminated.

Other

The cooperative reserves the right to inspect installations before issuing the rebate. If the application does not comply with the cooperative's rules and qualifications, the rebate amount may be adjusted.

Customers must apply for rebates within one year of the purchase date (as shown on the customer's invoice). Past eligibility, however, does not guarantee that equipment will meet criteria for current programs in effect.
